PROJECT SUMMARY

This multi-year project aims to identify insect pests responsible for reducing soybean yield and grain quality and how often control measures, including seed treatment and foliar insecticides, provide a return on investment. Insights will be used to determine threshold levels for these pests, as well as integrated management recommendations.

TRIAL LOCATIONS

WHY THIS RESEARCH IS IMPORTANT

- (1) There is insufficient research data about which insect pests are present in soybean fields, how they impact soybean yield, and at what infestation levels they cause economic damage.
- (1) There has been surprisingly little research about how often commonly used pest control tools, including foliar and seed-applied insecticides, provide an economic return in Illinois.

HOW THIS RESEARCH BENEFITS THE FARMER

- Farmers will gain valuable data about which insect pests are causing yield loss in Illinois soybean fields and how often insecticide applications provide a positive return on investment. Ultimately, researchers hope to refine management recommendations to make soybean farming more profitable.
- The information will help guide insect management recommendations provided by university and extension personnel.

SIGN UP FOR ON-FARM TRIALS

Four on-farm locations are being sought for this research for the 2025 growing season. If you are interested in hosting this research on your farm, fill out the interest form at **fieldadvisor.org/on-farm-trial-network**, or contact Dr. Nick Seiter.

The Illinois Soybean Association (ISA) checkoff and membership programs represent more than 43,000 soybean farmers in Illinois. The checkoff funds market development, soybean production and government relations efforts, while the membership program, Illinois Soybean Growers (ISG) and the Illinois Soybean Growers PAC actively advocates for positive and impactful legislation for farmers at local, state and national levels. ISA upholds the interests of Illinois soybean farmers through promotion, advocacy, research and education with the vision of becoming a trusted partner of Illinois soybean farmers to ensure their profitability now and for future generations.
