Soybeans still trying to emerge in dry and slightly crusted conditions..

**Which of the following best describes current conditions in this county?**

Mildly Dry (soil is drier than normal, plant growth may have slowed)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Abnormally Dry (D0)

#### **Quick synopsis of conditions that will appear in the main feed**

Planted on April 12th. Population of around 70,000 plants per acre, with many still trying to push through.  
We need a rain!
