Field Photo Upload Caption 1
Soybeans about to emerge.

Which of the following best describes current conditions in this county?
Mildly Wet (soil is wetter than normal, local vegetation is healthy)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here: https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx
Near Normal (Dnada)

Quick synopsis of conditions that will appear in the main feed
Many farmers wrapped up planting this week or have a significant amount planted at this point in the season. We received critical and gentle rains that will help kickstart this season on the right foot.

Weather
Spotty and variable showers this week

Precipitation

Field/Soil Conditions
Light showers have broken up field activity in areas - warm temperatures in the forecast won't keep us out of the fields for long.

Field/Soil Activities
Planting, tillage, spraying

Soybean Growth Stage
Not emerged to VC

Corn Growth Stage
Not emerged to VE
