Corn starting to emerge

Which of the following best describes current conditions in this county?

Mildly Wet (soil is wetter than normal, local vegetation is healthy)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

Quick synopsis of conditions that will appear in the main feed

Many farmers have been in the heart of planting this week and some are getting closer to finishing. We received critical and gentle rains that will help kickstart this season on the right foot.

Weather

Spotty light showers accompanied by warm temperatures

Precipitation

Field/Soil Activities

Tillage, planting, spraying

Soybean Growth Stage

Not emerged to VC

Corn Growth Stage

Not emerged to VE
