The deer must have had a snack already.

Which of the following best describes current conditions in this county?

Mildly Dry (soil is drier than normal, plant growth may have slowed)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

Quick synopsis of conditions that will appear in the main feed

Corn is up. This field was planted on May 4th and had about an inch and a half of rain after it was planted followed by warmer temperatures.

Weather

Cloudy with a chance of rain.

Precipitation

This field had about .4 on Friday night. Could use more.

Field/Soil Conditions

It's dry - cracks in the field. Soaked up all the rain it got and could use some more.

Corn Growth Stage
