County

White

Region/State

Region 6

Field Photo Upload Caption 1

Extreme rainfall amounts have soils saturated in White County, IL. Early planted soybeans are emerged and in need of a post herbicide application. The use of a drone allows this to happen when conditions are unfavorable for ground rigs.

Which of the following best describes current conditions in this county?

Moderately Wet (soil is damp, standing water may be present in low areas, water bodies are full)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

Weather

Sunny and 80 degrees

Precipitation

More than typical for this time of year

Field/Soil Conditions

Wetter than normal

Soybean Growth Stage

VE-V2

Corn Growth Stage

Spike - V4
