Herbicide injury

Which of the following best describes current conditions in this county?

Mildly Wet (soil is wetter than normal, local vegetation is healthy)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

Quick synopsis of conditions that will appear in the main feed

Some soybeans are showing signs of herbicide injury. Weeds are just starting to emerge. There was some minor bean leaf beetle feeding with a few plants showing signs of Phytophthora root rot.

Weather

80's

Precipitation

Rain last week
