Ogle

Region/State

Region 1

Which of the following best describes current conditions in this county?

Mildly Dry (soil is drier than normal, plant growth may have slowed)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

Quick synopsis of conditions that will appear in the main feed

A rain event at the end of last week slowed planting a bit but the string of dry days that have followed this week have allowed growers to catch up. Most fields in the area have been planted. The light rain and subsequent warm weather have provided fair conditions to help crops emerge.
