First flower - 06/08/23

### Which of the following best describes current conditions in this county?

Mildly Wet (soil is wetter than normal, local vegetation is healthy)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

### Quick synopsis of conditions that will appear in the main feed

Excellent soybean field under irrigation near Valmeyer (Monroe County). High yield potential and probably one of the best weed management programs I have seen this season.

**Weather**

Cloudy morning with temperatures near 65F, reaching highs of 80F

**Precipitation**

1/4 inch in the last 24 hours

**Soybean Growth Stage**

R1

**Corn Growth Stage**

V10

**Wheat Growth Stage**

Near harvest

**Weeds**

Excellent weed control. Few patches of grasses and jimsonweed near field borders

**Diseases**

Early symptoms of SDS
