Enlist injury on non-Enlist beans

Which of the following best describes current conditions in this county?

Moderately Dry (soil is dry, plants may be browning or stressed, water bodies are low)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Abnormally Dry (D0)

Quick synopsis of conditions that will appear in the main feed

Conditions are still dry as we have yet to receive measurable rainfall in the area. As POST herbicide applications are being made, caution should be heeded as to which varieties are being sprayed. Some non-Enlist soybean fields have had Enlist applications, resulting in serious damage and plant death. Soybeans are starting to flower, but plant growth has slowed.
