Soil is dry.

Which of the following best describes current conditions in this county?

Moderately Dry (soil is dry, plants may be browning or stressed, water bodies are low)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Severe Drought (D2)

Quick synopsis of conditions that will appear in the main feed

We received .3 inch of rain over the weekend - it was a welcomed rain but not nearly enough to make a dent in the drought.

Weather

Sunny and 76 degrees

Precipitation

.3 inches over the weekend

Field/Soil Conditions

Dry

Field/Soil Activities

Herbicide was sprayed on the beans this past week.

Soybean Growth Stage

V4

Corn Growth Stage

V7

Weeds

Weed pressure is spotty in both fields.
