### **Field Photo Upload Caption 1**

Corn plant at V4

### **Field Photo Upload Caption 2**

Row of corn at V3-V4 showing some yellowing likely due to cold wet soils.

### **Which of the following best describes current conditions in this county?**

Moderately Wet (soil is damp, standing water may be present in low areas, water bodies are full)

**If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:**

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

### **Quick synopsis of conditions that will appear in the main feed**

Most acres still unplanted. This V4 corn is by far the largest I've seen. Other emerged corn is spiking-V2 at most. Have seen no beans emerged yet.
