Assessing emergence at a breeding field

Field Photo Upload Caption 2
Difference in genetics

Field Photo Upload Caption 3
Waterhemp also emerging

Which of the following best describes current conditions in this county?
Moderately Wet (soil is damp, standing water may be present in low areas, water bodies are full)

Quick synopsis of conditions that will appear in the main feed
Crop that is planted and up looks to be variable based on moisture levels in the fields. Higher ground looks good and uniform. Low areas may be drown out or still yet to emerge.

Weather
Cloudy with more rain forecasted

Field/Soil Conditions
Dry on top. Too wet to do and tillage. Whole fields likely are not yet fit to plant.

Field/Soil Activities
None observed

Soybean Growth Stage
VC/VE

Corn Growth Stage
VE/V1

Wheat Growth Stage
Na

Insects
None
