County

Pike

Region/State

Region 4

Which of the following best describes current conditions in this county?

Near Normal

Quick synopsis of conditions that will appear in the main feed

With temperatures being in the mid 80s to near 90s, conditions dried up nicely to give a window for guys to wrap up their planting over the weekend and early this week. Many farmers have early corn post herbicide applications going out this week. Thanks to the recent rainfall that we had, this region no longer shows up as abnormally dry on the U.S. Drought Monitor map.
