County

Bureau

Region/State

Region 2

Which of the following best describes current conditions in this county?

Mildly Wet (soil is wetter than normal, local vegetation is healthy)

Quick synopsis of conditions that will appear in the main feed

Conditions this week were similar to last, with scattered showers and plenty of sunshine. The most mature soybeans I scouted this week were at V3, and the most mature corn was at V6. I'm starting to see more Amaranthus spp. popping up in fields.
