County

Peoria

Region/State

Region 2

Which of the following best describes current conditions in this county?

Mildly Wet (soil is wetter than normal, local vegetation is healthy)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

Quick synopsis of conditions that will appear in the main feed

Minimal planting is still happening in some areas along with some out spraying. The warmer weather has helped to dry things up but a rain on 6/5 may leave some ponding depending on individual field characteristics. Both corn and soybean growth stages are varied across the county but seeing an increase in weed pressure overall.
