Agronomy team scouting after Rend Lake FieldTalk

Which of the following best describes current conditions in this county?

Moderately Dry (soil is dry, plants may be browning or stressed, water bodies are low)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

Quick synopsis of conditions that will appear in the main feed

Hot and dry! Soybean quickly approaching R2 with some very, healthy, waterhemp that survived the last herbicide application. No disease, deer feeding in patches, and slight insect pressure.
