Soybean field outside of Augusta, IL

### Which of the following best describes current conditions in this county?

Mildly Dry (soil is drier than normal, plant growth may have slowed)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Abnormally Dry (D0)

### Quick synopsis of conditions that will appear in the main feed

Fields are dry, but not seeing a lot of stress in plants. This area could use a good rain. We saw our first field of tasseled corn. In one soybean field, seeing several grape colaspis beetle and couple of Japanese

beetles.

### **Field/Soil Conditions**

Dry with noticeable cracks.

### **Field/Soil Activities**

Beans being sprayed. Fungicides going on in corn.

### **Soybean Growth Stage**

R2

### **Corn Growth Stage**

V9-V10

### **Wheat Growth Stage**

Harvested.

### **Insects**

Sightings of Japanese beetle and grape colaspis beetle.

### **Weeds**

Waterhemp popping up after post application.
