**Name**

David Wessel

**Email**

dwessel@ilsoy.org

**Date**

July 16, 2024

**County**

Cass/Mason

**Region/State**

Region 4

**Field Photo Upload 1**

**Field Photo Upload 2**

### **Field Photo Upload Caption 1**

Soybeans at R2 to R3

### **Field Photo Upload Caption 2**

Covercrop planted following cereal rye harvest.

### **Which of the following best describes current conditions in this county?**

Mildly Wet (soil is wetter than normal, local vegetation is healthy)

### **Quick synopsis of conditions that will appear in the main feed**

Majority of crops are in excellent condition. Received 1 to 2 inches of rain last night with no storm damage. Moderate temperatures forecast for the next week should be beneficial.

### **Weather**

Ideal moisture last 2 weeks. Moderate temperatures forecast.

### **Precipitation**

1 to 2 inches this week.

### **Field/Soil Conditions**

Normal soil conditions.

### **Field/Soil Activities**

Aerial applications of fungicides on corn, and ground rigs in soybeans.

### **Soybean Growth Stage**

R2/R3

**Corn Growth Stage**

R1/R2

**Wheat Growth Stage**

Harvest complete

**Insects**

Japanese beetles around field edges Not at economic thresholds.

**Weeds**

Waterhemp escapes showing it's head above soybeans.

**Diseases**

Practically none present in both Soybean and corn.

**Abiotic Issues**

Very little stress

**Cover Crop Insights**

I did plant a mixture following Cereal Rye Harvest and it has emerged.
