Leaf and stalk damage from the July storms is evident now.

**Which of the following best describes current conditions in this county?**

Mildly Wet (soil is wetter than normal, local vegetation is healthy)

**Quick synopsis of conditions that will appear in the main feed**

In general, all the crops are looking good with very few issues other than weather related problems. Last week's surge in aphid populations is now a thing of the past with rainstorms, disease and predators sending the populations into a nosedive.
