**County**

Logan

**Region/State**

Region 4

**Which of the following best describes current conditions in this county?**

Near Normal

**If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:**

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Near Normal (Dnada)

**Quick synopsis of conditions that will appear in the main feed**

Some producers across Logan, Menard, and Sangamon counties have begun harvesting their crops. So far, the harvest has been predominantly of the earlier-planted corn, with earlier-planted soybeans not far behind. A majority of the corn and soybeans across the area still need some time to dry out before harvest, but expect more producers starting in the next couple of weeks.
