Harvest has begun with endrows and fields of early planted corn being harvested.

#### Which of the following best describes current conditions in this county?

Mildly Dry (soil is drier than normal, plant growth may have slowed)

If conditions are on the dry end, which of the following US Drought Monitor categories best fit current conditions. To better judge the fit, see explanation of USDM categories here:

<https://droughtmonitor.unl.edu/About/AbouttheData/DroughtClassification.aspx>

Abnormally Dry (D0)

**Quick synopsis of conditions that will appear in the main feed**

Corn is being harvested in my area, since a large wet milling corn processor announced no discounts for wet corn, only shrinkage to be applied. The only soybeans not turning yellow and reaching maturity are the double-crop fields.
